ARIZAL ANRU

Cikarang, Kabupaten Bekasi, Indonesia | 081296311129 | aarizalanru@gmail.com
linkedin.com/in/arizal-anru21 | github.com/arizalanru

PROFESSIONAL SUMMARY

Informatics student specializing in Artificial Intelligence at President University with hands-on experience building end-to-end AI systems across computer vision, machine learning, and full-stack development, from model training and backend architecture to deployment. Jababeka Scholarship recipient (Rank 2).

EDUCATION

President University — Cikarang, Indonesia **Sep 2024 – Present**

Bachelor of Informatics, Concentration in Artificial Intelligence | GPA: 3.69/4.00 | Expected graduation: 2027

- Coursework: Artificial Intelligence, Deep Learning, Natural Language Processing, Data Science, Software Engineering, Web Programming, Mobile Programming

SKILLS

Programming Languages: Python, JavaScript, TypeScript, SQL; Java, PHP, C++ (familiar)
Machine Learning & AI: PyTorch, TensorFlow, Scikit-learn, YOLOv8, ResNet, EfficientNet, XGBoost, LightGBM, Hugging Face Transformers, DeepFace
Web & Mobile Development: React, Next.js, FastAPI, Flask, Flutter, Streamlit, TailwindCSS
Data Science & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook, Orange
Databases: PostgreSQL, MySQL, Firebase, SQLite, TimescaleDB, Redis
Tools: Git, GitHub, Docker, Figma, Blender 3D

PROJECTS

Blibli Nexus AI — Full-Stack AI Logistics Platform **May 2026**

Frontend Developer & Data Engineer | Semifinalist, Blibli AI Open Innovation Challenge 2026.
Python, FastAPI, Next.js, TypeScript, Ray Serve, XGBoost, LightGBM, OR-Tools, Redpanda, TimescaleDB, Redis, Groq, Deck.gl, Docker

- Built the real-time fleet monitoring dashboard in Next.js + Deck.gl, streaming live GPS telemetry for 20 trucks via WebSocket with sub-second latency into an interactive map.
- Integrated 8+ backend REST/WebSocket endpoints (fleet analytics, SLA and carbon trends, route optimization) into the frontend, standardizing 8 Jabodetabek logistics hubs into a single source of truth.
- Developed the L1 data-source layer (ERP, weather, and traffic mock services) feeding the platform's downstream AI models.

GlowingKeun AI — Skincare Analysis & Recommendation Platform **Nov 2025**

AI Engineer & Backend Developer | Python, PyTorch, YOLOv8, ResNet18, DeepFace, Flask, React, TailwindCSS, SQLite

- Trained a ResNet18 skin-type classifier (4 classes) on ~6,600 images via ImageNet transfer learning, reaching 88.7% validation accuracy, served through a Flask REST API.
- Developed a YOLOv8n acne detection model localizing 6 skin conditions (blackheads, papules, pustules, nodules, whiteheads, dark spots) with bounding boxes.
- Implemented DeepFace biometric authentication using Facenet512 embeddings for password-free login, integrated into a React web app with real-time camera capture.

WellMom — Maternal Health Self-Assessment Mobile App **June 2026 – Present**

Scoring Engine Developer | Python, FastAPI, PostgreSQL, Git, Jira
Faculty of Computer Science × Faculty of Medicine collaboration, President University

- Designed a 4-tier maternal risk-scoring engine (Low/Medium/Warning/High) integrating red-flag overrides, blood-pressure classification (5 AHA categories), and time-based symptom-duration logic.
- Identified a clinical gap — missing high-fever (≥38°C) screening — by cross-referencing the assessment form against 13+ academic sources, later confirmed by the medical supervisor and added as a new question.
- Built a 54-case unit-test suite across 6 scoring modules (BP classifier, duration logic, growth z-score, fetal-weight check), all passing.

ORGANIZATION

Head of Entrepreneurship Division BEM Faculty of Computer Science President University **Sep 2025 – Present**

- Lead a 6-person division; launched a faculty merchandise line purchased by 160+ students, generating ~IDR 5.1 million net profit for the organization's treasury.
- Chaired the sponsorship division for 3 faculty events; secured IDR 56 million in cash sponsorships for Compsphere, the faculty's flagship annual event.
- Initiated the faculty's first company visit program, serving as vice chair (Indonesia Stock Exchange) and supervisor (Indosat Marvelous Xperience Center).

Co-Founder — Novotech **Mar 2025 – Present**

- Co-founded a digital services team providing web development and digitalization solutions for local SMEs; delivered and maintain a client website for ADA Property.
- Led marketing and client relations, driving outreach to prospective SME clients.

CERTIFICATIONS

- **Certified Competent in Computer Network and Telecommunications** — PT Skyline Semesta **2024**
